Not Many Store-Sales Are Uninfluenced by Store-Advertising!

The store-sales to-day that are uninfluenced, directly or indirectly, by store-advertising will not have amounted to ten per cent. of the total business of the day. By the direct influence of advertising is meant the sales of articles specifically advertised. By the indirect influence of advertising is meant the articles sold that are not specifically advertised, but are displayed to the customers who are drawn to the store BY THE ADVERTISED ARTICLES. In the latter case, as surely as in the first, the advertising must be credited with the sale. Observant merchants know that this is true. They should gain courage from the knowledge to strengthen their advertising campaigns to the point of matching their store-hopes and plans.

Dr. Lyon's PERFECT Tooth Powder Cleanses, beautifies and preserves the teeth and purifies the breath Used by people of refinement for almost Half a Century

SOCIAL AND PERSONAL

The announcement of the engagement of Edward Bayless and Elizabeth Dempsey was made yesterday. Mr. Bayless is a mailing clerk at the Post Office. Last evening at 7:30, at Trinity Episcopal church the marriage of Katherine Arroll of this city and Prof. George H. Lamson, Jr., of East Haddam was solemnized by Rev. Stoskoff. The bride was given away by her uncle, Walter Arroll, of New York City and was attended by Ruth New, the best man was George H. Hollister of Washington Conn. The ushers were James Arroll and Charles Russell. The wedding last night was the outcome of a romance begun when Miss Arroll was a student at Storrs college where Prof. Lamson was a teacher. The bride is the daughter of Robert Arroll. After their wedding trip the couple will live at Storrs. Manager H. H. Jennings of the Hartford Theatre in that city, but formerly of Bridgeport has leased his theatre to the Shuberts. The Hartford and the New Haven are the only theatres in the state putting on exclusively Shubert productions.

Miss Mary Finnigan, the dispensary nurse and Miss Frances Ladd, the visiting nurse at the local dispensary of the Tuberculosis Association, will leave to-day for New York. While in that city they will investigate the work in the tuberculosis wards at Bellevue hospital and return with changes in the routine of the local dispensary on their return.

Out on Brooklawn avenue is the only bonnet duck known. It is the property of Charles Wintzner who bred the bird without a breasstone. Mr. Wintzner has received communications from the London Sketch for a picture of the duck. He has also received clippings from the big continental papers in which the achievement of the local men is hailed as marvelous.

Just four months after she went to Portland, Ore., to attend the wedding of her son, Jesse, Mrs. Frederick Keppy of Park street, who was summoned to start home whence she was summoned by the death of her husband. Now word has come that floods have still further delayed her return trip. Mr. Frederick Keppy died shortly after his wife went west. His death was sudden and she was immediately summoned to return. She has been delayed for several months and it was not until last week that she left Portland. The heavy rains in the west held up traffic and Mrs. Keppy's long delay in reaching Bridgeport has been augmented.

PEOPLE'S FORUM

NO FIRE TUG WANTED. Editor of the Farmer.— Charles L. Gaylord, erstwhile candidate for mayor, has handed out an interview concerning the L. B. Silliman oil warehouse, which he says, is the surrounding buildings. He says, get a fire tug as a prevention. The neighbors of Mr. Silliman do not want the Silliman oil plant to be on the stage where it will require a fire tug. They do not want any fire at all. If there is ever a fire in the oil station Mr. Gaylord and his employees will stall left on the top floor of the building will wish they had an airship. Mr. Gaylord reminds me of the fellow who sat on the top of powder and smoked his pipe all day. When doctors begin to treat people by shooting into a crowd with a repeating rifle in order that they may hit a sick man then it will be high time for the city to purchase a fire tug to keep down the insurance rates in Water street. The city should have 300 barrels of oil in a place where 300 barrels of oil are stored. It will be necessary to use dynamite at the time that a fire tug could be brought into play. PLAIN CITIZEN.

HANDSOME SCARF PIN FREE A Wonderful Offer Made a New York Firm New York, July 28.—Thousands of persons all over the United States are taking advantage of a generous offer made by a New York firm making request for a beautiful gold plated scarf pin for either lady or gentleman which is mailed to the customer free of their name and address free of charge. R. Winn, 244 Stratford Ave. Sun rises tomorrow 4:45 a. m. Sun sets today 7:15 p. m. High water 6:53 a. m. Low water 12:45 p. m. Moon sets 12:30 a. m.

Trades School Hearing Friday

Bridgeport is to have the support of all the big towns and cities in the State in its fight to have a trades school located in this city by the State Board of Education. When the State Board of Education comes to the Stratfield Hotel in Danbury, Conn., for a hearing and learn the sentiment of the citizens of this city relative to a trades school it will find that the Park City Improvement Society, the Danbury, South Norwalk, and Stamford, and other places within a radius of 20 miles, representing a population of 225,000 people, are all in favor of the rising generation.

President Fred Enos of the Board of Trade announced last night at a meeting of the Trades School committee, that the Mayors of Danbury, Stamford, Norwalk and South Norwalk will help Bridgeport. The Board of Trade has been busy for some time getting the rest of the county awakened to the fact that a trades school at the county seat means education for boys of the entire county.

The Trades School committee is composed of fifteen citizens, five from the Y. M. C. A., five from the Manufacturers Association, and five from the Board of Trade. The sub-committee elected to appear before the Board of Education in favor of the trades school is made up as follows: Frank J. Mulcahy, president of the Crane Valve Co.; W. H. Webster, of the Bridgeport Brass Co.; A. W. Burnett, president of the Danbury Lumber Co.; E. P. Bullard, president of the Bullard Machine Tool Co.; Fred Enos, president of the Board of Trade; and George H. Lamson, Jr., of the Y. M. C. A.; Thomas H. Macdonald, general manager of the American Graphophone Co.; and George M. Eames, general manager of the Singer Manufacturing Co.

BABY'S BODY IN POTTER'S FIELD MOTHER GETS PERMISSION TO REMOVE REMAINS TO JEWISH CEMETERY. Mrs. Louise Loteska has been granted permission to remove the body of her baby from the Potter's Field at Leavelly to the Jewish cemetery. The child died at St. Vincent's Hospital in May. The whereabouts of the mother could not be ascertained by the police, but it is believed she was buried without her knowledge.

HAT COMPANY GETS AWARD OF \$218.70 The John H. Woltzhauser Co., hat manufacturers of South Norwalk, who were made defendants in a suit for \$1,000 brought by the John Traggensen of Cooper, N. Y., for recovery of the amount of \$218.70 by Judge Scott in the Common Pleas Court, the judge deciding in favor of the defendants. It is advantageous to hat manufacturers to recover the alcohol which has been used in the process of making hats, and to recover it, but after recovery it is rectified before it is used again. The companies entered into a contract to erect a plant to recover the alcohol, but the plan was abandoned as there was a dispute as to the amount due from one party to the other by reason of the cost of the experiment.

Naval Reserve Called to Sea Orders have been received to-day by Lieut. Albert Merritt of the Third Division of the Navy Reserve, calling on this city to report at the Brooklyn Navy Yard on Friday evening. The order comes from Captain Frank Cornwall of the Navy Militia. The Marines, 68 in number, will board the Machias at the Navy Yard and come up to New Haven, on August 7 they will begin their early cruise, sailing on the Machias to Provincetown, where they will meet the North Atlantic fleet. At Provincetown the men will be sent to one of the large battleships and be thoroughly instructed in the handling of the big guns and in target practice.

Paying the Shah To Leave Persia Teheran, July 28.—The newly organized government of Persia, despairing of raising money in any other way, is now turning to the Shah for a loan. The money to be used in paying the Shah to leave Persia without further trouble. The Shah, however, is still a refugee in the Russian capital but it is confidently believed that as soon as he is given sufficient money to pay for his departure toward Crimea under the escort of Russian Cossacks has been set for August. He will be taken to political prison as the Russian government believes this is the best way to win favor in Persia. The Shah knows that he is regarded as a political prisoner and he has appealed for assurances from the Russian government that he will be guarded closely. The officials have thus far made no refusal of the request.

NO. 1 FIRE COMPANY HAS UNNAMED GOAT FOR MASCOT. Somebody from New Haven handed the members of Fire Company No. 1 a goat which they have named 'Harlem variety'. The firemen adopted it and with the aid of the excess oil hose about the place together with the use of fire, the goat was driven to a chemical came will endeavor to rear the goat. The animal arrived in a crate, it is slightly over the tops of Bill Tobin's boots and is what is known as a haedus of the genus haplocercus or, in short, an ornery billy goat. As yet it has not been christened and in probability will not be until another test of the engines is made. The animal, through no fault of its own, is the first mascot of an engine company in the city of Bridgeport. The goat will now have to share the house with the members of the company, and as yet troubled the goat and simply regards it with superior air occasionally deigning to look askant at it.

FRENCH ACADEMY OF SCIENCE ON MANUFACTURED DIAMONDS (Special from United Press.) Paris, July 28.—Despite the recent exposure of Henry Moissan, the famous diamond manufacturer who is now serving a term in prison for his frauds, the Academy of Science is seriously investigating his claims to have discovered a process of manufacturing diamonds. The academy is about ready to determine whether or not the diamonds and the only question yet to be determined is whether by Moissan's new method or formula the manufacture of diamonds is a feasible. Moissan held back his formula for months waiting for the scandal connected with Lemoine to blow over.

MINISTERIAL CRISIS IN TURKEY FOLLOWS DECISION OF POWERS. (Special from United Press.) Constantinople, July 28.—A ministerial crisis in Turkey has followed the decision of the Powers in regard to Crete. The Turkey foreign minister, immensely unpopular because the Powers practically decided against Turkey in the dispute, has tendered his resignation. The policy of the foreign office will have to be changed to suit the people in the Cretan country. The Turkish people are demanding war with Greece but the government, though it wishes to do so, is afraid to declare war because of the fear of action by the European powers who have declared that there must be peace in the island. Crowds are marching through the streets of Constantinople yelling cries against Greece.

CHERBURG ALL EXCITEMENT OVER RECEPTION TO CZAR. (Special from United Press.) Cherbourg, July 28.—Cherbourg is undergoing a spasm of excitement over the preparations being made for the reception to the Empress and Emperor of Russia, of Cherbourg, Saturday. The French fleet which will act as escort for the Russian Imperial yacht, Standart, is now assembling at Brest and will come here Friday afternoon. At the same time French and Russian battleships will arrive and board the battleship Verite which will be the executive headquarters during the two days the Russian ruler is in these waters.

Sunday the Czar and Czarina will take lunch aboard the Verite after which they will be in a naval review in which the marines of the squadron will take part. Monday the Czar sails for Cowes, where he will meet King Edward. Accompanying the Standart will be the Russian cruisers Kurick and Makaroff.

A New York man has patented something new in the lightning rod line, a system of conductors that pass over all high points of a building, terminating in the ground on both sides, so that lightning will be led to earth, no matter where it strikes.

YOU'LL DO BETTER AT Kleban & Gelman's DRY GOODS EMPORIUM

Severest Test of Wright Aeroplane

(Special from United Press.) Washington, July 28.—Captive balloons, marking out the straightaway course over which Orville Wright is to fly his aeroplane in the final official government test, were placed in position this afternoon with one of the signal corps officers, probably Lieutenant Foulers as a passenger. The Wrights express every confidence over the contract, by reaching a 44 miles an hour speed, Orville looks upon the flight scheduled for this afternoon as the severest test he has yet undertaken. Never before has an aeroplane travelled, over a broken, hilly and partly forested tract of country such as that lying between Fort Myer and Shuter's Hill, near Alexandria, Va., over which to-day's trial will be made. Should anything go wrong with the motor requiring repairs, it will run the risk of striking in the tree tops. Perhaps the most pleased spectator of last night's world record breaking performance when Orville, with Lieutenant Lahm as a passenger, fulfilled the first half of signal corps requirements by circling in the air one hour, ten minutes and 46 seconds, was the 'captain' of the 'I suppose I've missed my dinner,' remarked the President as he climbed into the White House motor car after congratulating Orville 'but it was worth it.'

A SURPRISE PARTY WAS GIVEN TO JOHN FAHY

There was a delightful surprise party given John Fahy last evening at his home, 600 Howard avenue. Among those who were present enjoying a good time were: The Misses E. Pein, A. Pein, M. Walsh, L. O'Hearn, H. Kelly, F. Hayes, M. Fahy, E. Bosker, M. Murphy, M. Phebin, J. Maloney, Kitty Burns, J. McGraft, N. Fitzsimmons, A. McKee, T. G. Gallagher, Eddie Dube, C. Ross, J. Carroll, Joe Ryan, C. Clifford, H. O'Leary, J. Fitzsimmons, E. B. Dempsey, M. Rule, J. Kerns, J. Turney, H. Harroll, Mr. and Mrs. Brown, Mr. and Mrs. Fahy. A delightful lunch was served and many enjoyable games were played. The company departed at a late hour after spending a very fine evening.

Qualities of the Topaz

The name of the precious stone inserted in the ring of Gyges has not been handed down to us, but it is probable that it was the topaz, whose wonders Philostratus recounts in the life of Apollonius. An attribute of the sun and of fire, the ancients called it the gold magnet, as it was credited with the power of attracting that metal, indicating its veins and discovering the treasures. Heliodorus in his story of Theagenes and Charicles says that the topaz saves from fire all those who wear it and that Charicles was preserved by a topaz from the fiery vengeance of Arsaces, queen of Ethiopia. This stone was one of the first talismans that Theagenes possessed in Egypt. The topaz at present symbolizes Christian virtues—faith, justice, temperance, gentleness, clemency.—Paris Figaro.

Deaths and Funerals

Funeral services over the remains of William T. D. Patchen were held yesterday afternoon at his late home, 265 William street, prayers being offered by Rev. C. E. Barty, pastor of the Washington Park M. E. Church. Delegates from St. John's lodge, F. & A. M., and Samuel H. Harris lodge, I. O. O. F., attended the funeral. The pall bearers were John Bedient and John Johnson representing St. John's lodge; E. T. Abbott and F. L. Braddy of the Washington Park church; and Cornelius Larsen and James Pol, representing Samuel Harris lodge. Many of the members of the Washington Park church attended the funeral, because the deceased was a member of the official board of the church and also a teacher in the Sunday school. The ritual of the Odd Fellows was observed at the grave in Mountain Grove cemetery.

Called His Papa Down.

Little Willy is a bright boy and a saucy boy. His apt answers have often turned away wrath and often turned it upon him wrongly. The other day his father was reproaching him for some misdeed, and Willy was answering very saucily. The father became very angry and, setting the youngster by the collar, said: "See here, young man, you must not talk like that to me. I never gave my father impudence when I was a boy." Willy was not fazed at all. With a cherubic smile he looked into papa's eyes and said, "But, papa, maybe your father didn't need it." "Was all off. Willy escaped punishment, while papa retired to another room.

COUNT DE THUIN IN PRISON ON CHARGE OF SWINDLING.

(Special from United Press.) Paris, July 28.—Count Grenottin De Thuin, self-styled in a prison cell to-day awaiting trial on a charge of swindling insurance companies out of more than \$40,000. He has confessed to the police, to being the head of a gang organized to "frame up" automobile accidents. One scheme was to have a cheap, worn out auto insured against accident, then so fix the mechanism of the machine that the least shock greatly damaged it. The second plan was for the Count to insure himself against accidents to others. He would then run into some person—usually a woman who was in on the deal—who would profess to be seriously hurt. The Count's gang was so well trained and clever that whenever one of these "injuries" was pulled off, members of the gang were on hand and were always used as witnesses.

This Vale of Tears.

The news that science had at length discovered the means of destroying the germ of the last ill which flesh was heir to called forth rapturous rejoicings throughout the world. "Henceforth perfect health will reign universally!" people everywhere exclaimed and gave themselves up to congratulations. But that was not to be. In the very next day's paper was the account of somebody having invented a microscope so powerful as to reveal lot more germs, which meant, of course, that it would be no time at all until everybody was sick again.—Puck.

A CRUMB OF BREAD.

Its Effect on the Tip of a Vivacious Woman's Nose. "Isn't it terrible," said the society woman, "what a tiny thing can prove a tragedy to poor, self vaunting mankind! A speck almost invisible in the eye of an athlete may disempower him utterly and render him as helpless as a baby. And a lost hairpin or the breaking of a buckle may transform the most smartly groomed woman into an object of amusement to all observers."

On the Mend.

Bronson—I noticed your wife sitting by the window sewing this morning. I thought you told me yesterday she was ill. Woodson—So she was, but today she's on the mend.—Brooklyn Eagle.

Going Out.

Mr. B.—There, I've let my cigar go out. Do you know that it spoils a cigar, no matter how good it is, if you allow it to go out? Mrs. B.—Yes; a cigar is a good deal like a man in the respect.

His Start.

The World—Want a job, eh? What's your recommendation? Graduate—My A. E. The World—Sit right down, and I'll teach you the rest of the alphabet.—New York Life.

No Excuse.

"Is that horse you bought a kicker?" "A kicker?" answered Mr. Sirius Barker. "I am the fellow who paid twice his value and who is buying the feed. What has the horse got to kick about?"—Washington Star.

His Misfortune.

The Poet—Poets are born, not made. The Girl—I know. I wasn't blaming you.—Boston Transcript.

There are certain flowers the perfume of which, it is said, is produced by microbes.
